## PROJECTS

### Delivery ETA Prediction & Dark-Store Analysis - XGBoost, Geospatial ML

[Live App](#) | [GitHub](#)

- Built an ETA regression workflow on **42,508 delivery records**, engineering Haversine distance features with leakage-safe, train-only preprocessing.
- Tuned XGBoost to **MAE 3.01 min, RMSE 3.76 min,  $R^2$  0.840**; added SHAP explanations for model interpretability and deployed an interactive Streamlit app.
- Analyzed dark-store proximity using BallTree + Haversine distance across **287,065 customer-store pairs**, evaluating candidate stores by customer proximity and geographic coverage to support nearest-store fulfillment and last-mile delivery analysis.

### Meal Demand Forecasting - XGBoost, Time-Series Validation

[Live App](#) | [GitHub](#)

- Modeled **456,548 demand records** spanning 145 weeks, 77 fulfillment centers, and 51 meals; engineered lag, rolling-history, center-meal, promotion, and price features.
- Designed leakage-safe expanding-window validation with recursive week-by-week predictions over a 10-week horizon, benchmarked against a latest-value baseline.
- Reduced recursive CV RMSLE from **0.825 to 0.515 (~38%)** with XGBoost; compared against ETS, SARIMA, and Prophet and analyzed errors across demand segments.

### Heart Disease Prediction - Classification, Streamlit

[Live App](#) | [GitHub](#)

- Compared five classification models on 918 patient records using accuracy and F1-score; Logistic Regression achieved **90% accuracy and 89% F1**.
- Packaged the trained model into an interactive Streamlit prediction app for real-time inference.

## TECHNICAL SKILLS

|                  |                                                                                                                                |
|------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Languages        | : Python   C++   SQL                                                                                                           |
| Machine Learning | : scikit-learn   XGBoost   SHAP   Regression   Classification   Feature Engineering   Model Evaluation   Hyperparameter Tuning |
| Time-Series      | : Forecasting   Recursive CV   Expanding-Window Validation   ETS   SARIMA   Prophet                                            |

## EXPERIENCE

### Connecttly

Feb 2026 – Mar 2026

UX Design & Content Intern

Remote

- Designed website UI assets and product-update content in Figma, maintaining consistent layouts and iterating based on team feedback.

### AWS Cloud Club, University of Lucknow

Oct 2025 – Present

Tech Team Member

Lucknow

- Supported a hands-on cloud learning workshop and coordinated across design and technical teams; previously contributed event materials as a Design Team Member.

## EDUCATION

### University of Lucknow, Faculty of Engineering & Technology

2024 – 2028

B.Tech - Computer Science & Engineering

CGPA: 8.0/10
